PVP MISSIONS

TACTICAL ENGAGEMENTS ACROSS A GALAXY IN RUINS

"We once believed war would end when the stars themselves dimmed. We were wrong. The stars are gone, and still we fight over scraps of metal, over relics of dead gods, over the idea that any of this still matters.

Every mission you read in this record was real once. Squads bled for these orders. Some triumphed and carved their marks into the ruins; others vanished beneath the dust of worlds that no longer have names.

If you are holding this field manual, you are part of what remains. Learn these operations well. Out there, knowing which ruin to hold (or which to burn) means the difference between survival and extinction."

Excerpt from the Warfront Archives, Cycle 2279.6

Across the shattered frontier of the galaxy, war is constant. Squads of elite operatives clash in the ruins of cities, alien jungles, desecrated temples, and endless wastelands, each battle a fleeting spark in the dark expanse of the Ruinstars. These are not grand crusades of empire, but desperate struggles fought by the few who dare to step onto the battlefield when hope has long since burned away.

This section collects the missions and battlefields that define warfare in the Ruinstars setting. Within these pages, commanders will find everything they need to wage battle, from quick-play engagements and solo challenges to full three-part operations and sprawling, multi-stage campaigns. Every victory and defeat shapes the next confrontation; every decision carries the weight of survival.

Each mission offers unique tactical puzzles and narrative flavor, challenging you to adapt your strategy to shifting objectives and hostile environments. Whether you fight for the glory of the Human Hegemony, the hunger of the Swarm, or the whispers of the Silent Choir, every operation offers a chance to carve your name into the scars of the galaxy.

Note you will need the [Core Rules PDF](#) to play this mode.

PLAYING A MISSION

These missions are designed to be played as quick, one-off skirmishes perfect for pick-up or competitive play.

Each Mission is a single battle between two Squads, typically lasting 4 Turns. Victory in these engagements is decided by calculating the total Mission Points (MP) scored by each Squad at the end of Turn 4.

Alternatively, you can use these missions to build your own Campaign. A full Campaign is structured into three distinct Operations, and each Operation is composed of three Missions, totaling nine confrontations. These missions offer unique tactical puzzles and narrative flavor, challenging you to adapt your strategy to shifting objectives and hostile environments.

Whether you are playing a quick one-off mission or a long, epic campaign, the rules for playing each Mission are the same:

1. Select a Battlefield
2. Roll a random Deployment
3. Each Squad secretly rolls their Objective (1D6 Archetype + 1D6 Variation)
4. Reveal Objectives simultaneously
5. Set up your Squads (place markers per each Squad's Objective)
6. Play!

BATTLEFIELDS

CITY: The Ruined City

Collapse

The battlefield itself is killing you. At the start of each Turn after the first, roll for a random Anchor. All terrain within 4" of that Anchor is removed from the battlefield, and all Units within 4" of that Anchor take 2 Damage.

FAC: The Facility

Darkness

At the start of each Turn after the first, select one random Anchor. Until the end of the Turn, Units within 4" of that Anchor cannot be targeted in Ranged Combat.

JUNG: The Jungle

Miasmic Mist

At the start of each Turn after the first, select one random Standing Unit from each Squad. That Unit moves 2" three times in random directions (roll three times). This does not trigger Attacks of Opportunity. If that Unit cannot make a valid move because of a wall or other obstacle, it takes 1 Melee Damage.

HIVE: The Alien Hive

Noxious Gas

At the start of each Turn after the first, select one random Anchor. All Units within 4" of that Anchor take 1 Damage.

TEMPLE: The Cursed Temple

Haunting Spirits

At the start of each Turn after the first, select one random Unit from each Squad. That Unit is overtaken by the temple's restless spirits and immediately attacks the closest Unit in Combat, Squadmate or enemy.

RIFT: The Rift

Shifting Realities

At the start of each Turn after the first, select one random Anchor, then roll **1D6**. **1-3:** All Units within 4" of that Anchor immediately move 2" directly toward it. **4-6:** All Units within 4" of that Anchor immediately move 2" directly away from it. This does not trigger Attacks of Opportunity.

TRENCH: The Trenches

Artillery Strike

At the start of each Turn after the first, select one random Anchor. All Units not in Cover that are within 4" of that Anchor are immediately Pinned. Pinned Units must spend one additional **ACT** each time they perform the Move action during this Turn.

BAD: Badlands

Rad Exposure

At the start of each Turn after the first, each Standing Unit rolls **1D6**. Results above that Units **ARM** score cause that Unit to gain 1 Rad Counter. At the start of each Turn, all Units take damage equal to their Rad Counters.

DER: Void Derelict

Hull Breach

At the start of each Turn after the first, select one random Anchor. A hull breach opens: all Units within 3" of that Anchor must pass an ARM test or be dragged 3" directly toward that Anchor. Units dragged into a wall or other Unit take 1 Damage. This does not trigger Attacks of Opportunity.

DEPLOYMENTS

Each mission is played on one of the following standard deployments. At the start of each mission, before objectives are revealed, roll 1D6 to select a deployment. Each deployment defines two positions: *Squad A* and *Squad B*. Both players roll off; the winner chooses which squad they are.

When a mission instructs both Squads to deploy at the same time (e.g. "before Turn 1"), players alternate placing one Unit at a time. The player without Turn 1 initiative deploys their first Unit, then the player with initiative deploys one Unit, and so on until all Units are deployed. The player with initiative activates first in Turn 1.

1: Standard Insertion

Squad A Adjacent to the SW, S, or SE Anchors. Squad B Adjacent to the NW, N, or NE Anchors (split evenly), in Cover or out of sight where possible.

2: Hot Drop

The insertion was faster than expected. Squad A deploys Adjacent to the N, S, E, or W Anchors. Squad B deploys Adjacent to the NW, NE, SW, or SE Anchors (split evenly), in Cover or out of sight where possible.

3: Flanked

Intel was wrong. The enemy is coming from two directions. Squad B deploys Adjacent to the NW or NE Anchors (split evenly), in Cover or out of sight where possible. Squad A deploys within 4" of the S Anchor.

4: Deep Strike

Both sides arrived at the same time. Squad A deploys within 4" of the SE anchor. Squad B deploys within 4" of the NW anchor, in Cover if possible.

5: Overwatch

The enemy holds the high ground and saw you coming. Squad B deploys Adjacent to the W, N, or E Anchors (split evenly), in Cover or out of sight where possible. Squad A deploys Adjacent to the SW, S, or SE Anchors.

6: Encircled

Extraction just got complicated. Squad A deploys within 4" of the Center anchor. Squad B deploys Adjacent to the NW, NE, SW, or SE Anchors (split evenly), in Cover or out of sight where possible.

OBJECTIVES (2D6)

At mission start, each Squad secretly rolls their Objective using 2D6: roll 1D6 for the **Archetype**, then 1D6 for the **Variation**. Both Squads reveal their Objectives simultaneously. Each Squad pursues their own Objective independently.

Special: Activate - Mission Action (2 ACT): A Unit Activates an Objective it controls. On Activation, roll **1D6**: First activation: The item is found on **1**. Second activation: The item is found on **1-2**. Third activation: The item is found automatically. This roll cannot be modified or re-rolled using TO. The Unit that finds the item now carries it (can be dropped or passed to a Squadmate for 1 ACT).

Victory: In PvE: The carrying Unit must extract successfully to complete the Objective.

In PvP: The item must be carried by a Standing Unit at the end of the mission.

5-6: DESTROY

1-2: Full Denial

Setup: Place three Objectives on three random Anchors.

Special: Objectives are items with **ARM 4 HIT 3**.

Victory: Destroy all three Objectives.

3-4: High-Value Target

Special: Objective is an item with **ARM 4 HIT 6**.

Special: Objectives are items with **ARM 4 HIT 3**. At the end of each Turn, remaining Objectives regain 1 lost **HIT**.

Victory: Destroy two of three Objectives.

CAMPAIGNS

CAMPAIGN STRUCTURE

A Campaign is composed of three Operations, each composed of three Missions.

1. Operation 1 - Missions 1.1, 1.2, 1.3 - Homebase
2. Operation 2 - Missions 2.1, 2.2, 2.3 - Homebase
3. Operation 3 - Missions 3.1, 3.2, 3.3 - Homebase

OPERATIONS

An Operation is three sequential Missions. When the Operation begins, both Squads are considered in the field. While deployed in the field, Squads cannot change their Units or Gear between Missions, and any Mission Points (MP) earned during these Missions cannot be spent on new Units or Gear.

Once the third Mission of an Operation is complete, both Squads return to Homebase to heal Injuries, make new Gear selections, and recruit new Units by spending their hard-earned MP.

MISSION SCORING

At the end of each Mission, both Squads score MP as follows:

- **+2 MP** for completing the mission (both Squads)
- **+2 MP** if your Squad achieved your Objective's Victory condition
- **+2 MP** if all enemy Units were Taken Out

If both Squads have all their Units Taken Out at the end of the Mission, both Squads score the +2 MP bonus. Each Squad's Objective is evaluated independently; it is possible for both, one, or neither Squad to score the Objective MP.

BETWEEN MISSIONS

After completing a Mission but before beginning the next one in the same Operation, each Squad may remove one Injury from any one of its Units (not one per Unit, one total across the Squad). Deceased is not an Injury and cannot be removed this way; a Deceased Unit remains out of action and cannot be replaced until the Squad returns to Homebase.

HOMEBASE

At the end of each Operation, after the third Mission, both Squads return to Homebase simultaneously.

1. Remove all Deceased Units from your Squad.
2. Remove one Injury from each remaining Unit.
3. Recruit new Units into the Squad (maximum 100 GP).
4. Make changes to your Squad's selected Gear.
5. Assign all earned Spoils of War to Units in your Squad.

SPOILS OF WAR

When the Squad returns to Homebase, it can purchase Spoils of War by spending MP earned during the previous Operations. Each Spoil of War costs 3 MP and applies to one specific Unit.

INJURIES

At the end of each Mission, each of your Units that was Taken Out during the mission may have a persistent injury. Between Missions within an Operation, the Squad may remove one Injury from a single Unit of their choice (not one per Unit - one total). At Homebase at the end of each Operation, one Injury may be removed from each Unit. Note that Deceased is not an Injury, it is permanent, and cannot be removed by either recovery step.

At the end of each Mission, for each Player Unit that was Taken Out, roll **1D6** to determine the Injury this Unit received.

If the Injury is one that the Unit already had, that Unit is Deceased. Remove the Unit from the Squad. That Unit cannot be replaced until the Squad returns to Homebase at the end of the Operation.

INJURIES LIST

- **1/2 - RECOVERED**

No new injury.

- **TOUGH 1**

Each time this Unit is the target of a Melee Combat attack, it may re-roll up to 1 of its Armor Saves. This is cumulative with other Tough specials.
